

NebuLAW Docs - v3.21 Release Notes

New Features

★ iManage Workspaces for Safe Custody

iManage Workspaces for Safe Custody Packets are now supported.

For Administrators

Follow the [Safe Custody Workspaces Setup Instructions](#) guide to set this feature up in your organisation.

★ Invocable iManage Document Upload function

A new invocable action called **Upload Documents (iManage)** is now available for use within flows to programmatically upload documents to iManage.

NebuLAW Docs - v3.22 Special Release Notes New Features

★ Matter Type tracking for Profile Group Records

Matter Types that are linked to NetDocuments profiles can now be tracked on **NetDocuments Profile Group** metadata records using the new **Matter Type Field** field.

Enter the API name in this field from which the value should be pulled on a Matter record.

The field value is then used for mapping to the Type field in NetDocuments.

FDR Legal Client Key	FDR Legal Client Description	FDR Legal Matter Key	FDR Legal Matter Description	Type
C000480	Test Individual	FDRIND-00342	Purchase of Test Property	Residential - Peterborough

Improvements to existing features

Use of Instance-based Connection Settings

Connection Settings that are set on a per-user or profile basis are now acknowledged instead of just using the Org Defaults.

Previously, only the values set in the Org Defaults are recognised and profile- or user-based records are ignored.

NebuLAW Docs - v3.23 Release Notes Release Highlights

Improvements to existing features

Add exception handling on netdocs workspace creation queue

Workspace creation will now stop if a failure occurs during a batch process, ensuring issues are addressed early and preventing inconsistent setups.

iManage and SM22 integration enhancement

Documents lodged via Unity Search will now be automatically uploaded to the correct iManage workspace and folder once received, streamlining the workflow.

NebuLAW Docs - v3.27 Release Notes New Features

☀️ **Automatically Apply iManage Folder Templates**

iManage Folder Templates can now be automatically applied when creating new workspaces.

NebuLAW Docs - v3.28 Release Notes

☀️ **Separate iManage Admin Credentials**

There is now a separate **iManage Admin Named Credential** custom setting field for nominating a named credential specifically for running background processes like creating workspaces.
